

VEGA

V · G · A™

The VEGA Deluxe brought you extra-high resolution. This VEGA can give it to you up to 400% faster.

FASTER GRAPHICS. LESS DISTORTION. MORE COLORS. VIDEO SEVEN IS MAKING YOUR COMPUTER LOOK BETTER ALL THE TIME.

You don't have to buy a new computer to enjoy the advantages of the new Video Graphics Array (VGA) standard. Our VEGA VGA™ adapter brings all the performance and graphics capabilities of the new IBM PS/2 line to your IBM PC/XT/AT, IBM compatible or PS/2 Model 30.

YOU CAN'T GET MORE COMPATIBLE.

The VEGA VGA is fully compatible with all existing graphics standards. So you can run new VGA programs.

Or any programs you may already have for the Enhanced Graphics Adapter (EGA), Color Graphics Adapter (CGA), Monochrome Display Adapter (MDA) or Hercules Graphics Card (HGC). Plus, for the first time, this compatibility exists at the hardware level. That means that the VEGA VGA automatically switches between modes, eliminating the need for any software emulation program, whether on diskette or in ROM.

SUPPORT FOR YOUR MONITOR.

The VEGA VGA has both analog and digital connectors, so it can support both old and new generation monitors. With a variable frequency monitor, you get a resolution of 640 x 480 and an additional high resolution of 800 x 600, both with a choice of 16 on-screen colors from a palette of 64. With an analog monitor, you get a palette of 262,144 and can select 256 simultaneous colors with a resolution of 320 x 200, or 16 simultaneous colors with resolution of 640 x 480.

SUPPORT FOR YOUR SOFTWARE.

The VEGA VGA comes with high-resolution drivers for Windows, AutoCAD and Lotus 1-2-3 graphics, as well as a 132-column x 43-line format for 1-2-3, Symphony, WordPerfect and WordStar. Many other popular packages are supported in VGA resolution, such as Pagemaker, Ventura, Harvard Graphics, GEM and Publisher's Paintbrush.

TECHNOLOGY THAT'S SETTING THE INDUSTRY STANDARDS.

Video Seven was instrumental in pioneering the use of surface-mount technology. Later adopted by IBM, this advanced manufacturing technique allows for lower power consumption, less heat build up and higher reliability. The VEGA VGA also benefits from a built-in hardware graphics cursor that enhances performance in programs such as Microsoft Windows. What's more, the board has been designed to fit in a short slot, giving you flexibility when you install, and plenty of room to expand when you're ready for future upgrades.

SPECIAL FEATURES:

- Up to 400% faster than an EGA.
- High resolution (800 x 600) drivers for Microsoft Windows, AutoCAD, Lotus Text and Graphics.
- Smartswitch hardware state switching.
- Menu driven program for setup and driver installation.
- Hardware graphics cursor.
- "SAVE" function turns off the display after a period of inactivity selected by the user (normally set to five minutes).

MONITOR COMPATIBILITY:

- IBM PS/2 or compatible analog monitor.
- NEC MultiSync or compatible monitor (digital or analog).
- IBM Enhanced Color Display (or 350 line, 64 color RGB R'G'B' compatible).
- IBM Color Display (or 200 line, 16 color RGBI compatible).
- IBM Monochrome Display (or IBM-compatible TTL monochrome monitor).

Note: Resolution capability may be limited by your monitor.

GRAPHIC MODES:

No. of Colors	Pixels	Pages (max.)	Display Req'd(1)	Adapters Emulated(2)
256	320x200	1	AD	VGA
16	320x200	8	CD/ECD	EGA
16	640x200	4	CD/ECD	EGA
2	640x350	1	MD	EGA
2	640x350	2	MD	EGA
4	640x350	1	ECD	EGA
16	640x350	2	ECD	EGA
4	320x200	1	CD/ECD	CGA, EGA
2	320x200	1	CD/ECD	CGA, EGA
2	640x200	1	CD/ECD	CGA, EGA
2	720x348	2	MD	HGC
16	640x480	1	AD, VF	VGA
16	752x410	1	VF	VEGA Deluxe
16	800x600	1	VF	VEGA VGA

ALPHANUMERIC MODES:

No. of Colors	Char. x Rows	Char. Cell	Pages (max.)	Display Req'd(1)	Adapters Emulated(2)
16	80x25	9x16	8	VF, AD	VGA
16	80x25	8x14	8	ECD	EGA
16	132x43	8x8	4	ECD	EGA
2	132x43	8x8	4	MD	MDA, EGA
2	40x25	8x8	8	CD/ECD	CGA, EGA
16	40x25	8x8	8	CD/ECD	CGA, EGA
2	80x25	8x8	8	CD/ECD	CGA, EGA
16	80x25	8x8	8	CD/ECD	CGA, EGA
2	80x25	9x14	8	MD	MDA, HGC, EGA
16	80x60	8x8	2	VF	VGA

(1) CD = Color Display, ECD = Enhanced Color Display, MD = Monochrome Display, VF = Variable Frequency, AD = Analog Display
 (2) EGA = Enhanced Graphics Adapter, MDA = Monochrome Display Adapter, HGC = Hercules Graphics Card, CGA = Color Graphics Adapter, VGA = Video Graphics Array, VEGA Deluxe = higher resolution than currently supported by IBM, EGA standard, VEGA VGA = higher resolution than currently supported by IBM, VGA standard.

When using an analog monitor, the number of colors available are chosen from a palette of 262,144 colors; with a variable frequency digital or ECD monitor, the palette is 64 colors.

DIMENSIONS:

- PC Board: 4.2 in. high x 5.4 in. long (fits short slot of IBM PC/XT).
- Connectors: (1) DE-9 female, compatible with IBM EGA, CGA, or MDA (digital video).
 (1) 32-pin, EGA-compatible "feature connector."
 (1) 6-pin, keyed (pin 2 removed) light pen connector.
 (1) 15-pin, keyed (1 pin missing) PS/2 compatible analog video

WARRANTY:

- All Video Seven products are guaranteed to be free of defects in material and workmanship for a period of five years from date of purchase. (See Warranty Card for more information.)
